Part I

The First Part

Chapter 1

The First Chapter

1.1 Introduction

This is the first section. Pretty cool huh? The section will continue until you specify the next section or chapter, and then it'll start the new section or chapter.

1.2 Second Section

Sections can even have their own subsections!

1.2.1 First Subsection

This here is a subsection of the section, in case you need to break it up even more.

You can break it up *even more* with subsubsections!

First Subsubsection

Now this is getting ridiculous. I guess we can just roll with it.

Now we will add some tables!

Here is a basic table, with no borders whatsoever.

cell1	cell2	cell3
cell4	cell5	cell6
cell7	cell8	cell9

What if we wanted vertical borders?

cell1	cell2	cell3
cell4	cell5	cell6
cell7	cell8	cell9

The above example has a few vertical borders.
What if we want horizontal borders?

cell1	cell2isthis	cell3
cell4	cell5	cell6isthis
cell7isthis	cell8	cell9

We can also add captions, labels, and references to the tables.
Table 1.1 is an example of these referenced LaTeX elements.

Col1	Col2	Col2	Col3
1	6	87837	787
2	7	78	5415
3	545	778	7507
4	545	18744	7560
5	88	788	6344

Table 1.1: Table to test captions and labels

Unnumbered Section

Not all sections need to be numbered! Or maybe you don't want any of the sections to be numbered!

First Paragraph I guess if you do want to go smaller than a subsubsection, then you use paragraphs.

First Subparagraph And if a paragraph isn't enough, we break it up into subparagraphs.
